Access video training - Access - support.microsoft.com

Remarks. You can use the DateDiff function to determine how many specified time intervals exist between two dates. For example, you might use DateDiff to calculate the number of days between two dates, or the number of weeks between today and the end of the year.. To calculate the number of days between date1 and date2, you can use either Day of year ("y") or Day ("d").

DateDiff Function - Access
