Administrator Guide (Dynamics 365 Marketing) | Microsoft Docs

admsnap start -s SecondaryFileGroup-o h: My question is this: If we find ourselves in the unfortunate position of having to do a rollback, will the data be consistent? My concern is that since the log file and database file are so interdependent that the snapshots won't occur in parallel and thus the snapshot would be virtually useless.

Looking for navicli commands to start/stop snap sessions ...

Using admsnap and our Clarion AX150i on 2003 servers, I am trying to flush and then start a snapshot on the source and then activate it on the target machine, all from the target machine. I was hoping to add this as a pre backup command. I have a perl script running on the target machine which runs the admsnap command from the c\$ share:
