Business Process Automation & Connectivity | Software AG

That said, how do companies automate business processes?

File Type PDF Business Process Automation Aris In Practice

Traditional approaches to business process automation involve implementing a Business Process Management (BPM) tool and integrating systems through point-to-point connections. These approaches, however, no longer suffice because these one-to-one connections lead to tangled connections which, in turn, hinders visibility to data in underlying systems.

The role of APIs in business process automation | MuleSoft

I am really interested about process automation that ARIS Connect platform offers via APG. I read about ARIS Mini workflows which allows creation of automated workflows such as change management, release cycle management etc from the governance database. I believe this is really powerful in eradicating lot of manual work in BPM teams.
