The Open Library has more than one million free e-books available. This library catalog is an open online project of Internet Archive, and allows users to contribute books. You can easily search by the title, author, and subject.

#### **Cessna 310 Aircraft Pilot Owners**

Pilots coming from other light twins will recognize the 310's as a large step up; it feels like a much larger, more substantial airplane than, say, an Apache or Travel Air. As for those moving up through the Cessna line, a 210 pilot will most definitely notice the 310's heavier controls, higher wing loading, and greater approach and landing speeds.

#### **Cessna 310 - AOPA - Aircraft Owners and Pilots Association**

The Cessna 310 is an American six-seat, low-wing, twin-engined monoplane that was produced by Cessna between 1954 and 1980. It was the first twin-engined aircraft that Cessna put into production after World War II.

Many 310 owners (whether powered by 470s or 520s) choose to operate LOP, and there's a significant fuel savings. You can expect low 20s GPH combined for speeds in the mid 170s to mid 180s. By the end I managed to get 23 GPH combined for 190 KTAS, but like I said I put a lot of effort into streamlining the 310.
