Superpave roots and LCPC. In the 1970s, after seeing the Texas gyratory compactor during a 1959 visit to the U.S., the French national highway agency, then known as Laboratoire Central des Ponts et Chaussées (LCPC), developed a mix design method based around a gyratory compactor they designed. In the LCPC method there is a range of allowable ...

A look at Superpave5 | Asphalt magazine

The Superpave mix design method was designed to replace the Hveem and Marshall methods. The volumetric analysis common to the Hveem and Marshall methods provides the basis for the Superpave mix design method. The Superpave system ties asphalt binder and aggregate selection into the mix design process, and considers traffic and climate as well.
