Giving your pet food before surgery could lead to vomiting or pneumonia. Pet lovers worry so much about anesthesia, often to the extent of delaying or completely avoiding procedures that can truly benefit their pets, such as comprehensive oral care, because those procedures require their pets to be put under.

Food Animal Standing Sedation Protocols. Cattle are generally happy with standing sedation using only a local block or an epidural. Any surgical procedure in a non-anesthetized cow (standing or recumbent) involves some form of local analgesia. We typically use lidocaine as a local infusion, inverted "L" block, or paravertebral block for abdominal surgeries.
