Blobs of molten glass are gathered from an oven onto the end of a tube, and the glassblower blows through the tube to make a bubble in the glass at the tip.The glass needs to be frequently rotated, cooled and reheated so it can be shaped to roughly the desired dimensions of the job.

The Glassblowing BIBLE - Shroomery

Glass blowing is just what it sounds like: a procedure that mostly consists of blowing air through a tube in order to form molten glass into various objects. Humans have been doing this since glass blowing was invented in Syria, 2000 years ago. For most of that time, only select people had the knowledge or tools necessary to make glassware.

The Scientific Glassblowing Learning Center: Home Page

The blowpipe is being held in the glassblower's left hand. The glass is glowing yellow. Glassblowing is a glassforming technique that involves inflating molten glass into a bubble (or parison) with the aid of a blowpipe (or blow tube). A person who blows glass is called a glassblower, glassmith, or gaffer.

Glass Blowing Books - Goodreads

Steve Stadelman, a machinist by training, started blowing glass as a hobby in the mid 1990s. To feed that hobby, Stadelman built himself a glass blowing furnace he used to create a variety of glass pieces - mostly for fun. "I built it with a heating element that worked well, but I didn't know much about it," Stadelman says.
