Manning | Hello World!

A "Hello, World!" program generally is a computer program that outputs or displays the message "Hello, World!". Such a program is very simple in most programming languages, and is often used to illustrate the basic syntax of a programming language. It is often the first program written by people learning to code. It can also be used as a sanity test to make sure that a computer language is correctly installed, and that the operator understands how to use it.

"Hello, World!" program - Wikipedia

But the real reason “Hello, World” is so popular is its sheer metaphoric jolt. It taps directly into the thrills of programming, which are deeply Promethean. After all, writing and running code...
