The test is appropriate for four different types of packages commonly distributed as individual packages, either by air or ground.

ISTA Procedure 3A - Packaged-Products for Parcel Delivery ...

The ISTA 3A test was created in the year 2008 with the purpose of guaranteeing the safe transportation of individual packages weighting less than 70 kg (150 lb) sent to the end consumer via a parcel delivery system. Therefore, this protocol should be complied with by all companies that send their products via parcel services.

How to attain the ISTA 3A packaging certification - Safe ...

Other ISTA Procedures may be appropriate for different conditions or to meet different objectives. Specific suggestions: • To use random vibration instead of fixed displacement vibration, use ISTA Test Procedure 1G and not 1A. • For packaged-products where a minimum compression value should be tested, use ISTA Test Procedure 1C.

ISTA Procedure 1A 01-06 - enrib.com

ISTA 2A tests are for packaged-products 150 lb. (68 kg) or less, and are a combination of basic test elements from ISTA 1A (Non-Simulation Integrity Performance Testing) and advanced test elements from ISTA 3A (General Simulation Performance Testing). Procedure 2A simulates some actual transport hazards such as temperature and humidity.
