Job Hazard Analysis - missourimanufacturers.org
A job hazard analysis is a technique that focuses on job tasks as a way to identify hazards before they occur. It focuses on the relationship between the worker, the task, the tools, and the work environment. Ideally, after you identify uncontrolled hazards, you will take steps to eliminate or reduce them to an acceptable risk level. 2

Job Hazard Analysis
One of the best ways to determine and establish proper work procedures is to conduct a Job Hazard Analysis (JHA). JHA, sometimes referred to as a Job Safety Analysis (JSA) is a written description of job tasks identifying hazards before they occur. It focuses on the relationship between the worker, the task, the tools, and the work environment.

Natural Stone Institute - Job Hazard Analysis (JHA) Documents
What is Job Safety Analysis (JSA)? JSAs are used to describe how to perform a task step-by-step, any hazards associated with a task, and controls to mitigate these hazards. JSAs can be used to educate employees on safe practices prior to utilizing equipment.
