Therefore, plugs are always dead until they are plugged into a power source such as a wall outlet or generator outlet. NEMA Configurations This chart shows the most common NEMA configurations in use in North America for 125ac and 250Vac single phase systems.

NEMA Plug and Receptacle Configurations

Informational. Resolution: The NEMA 5-15 receptacle is the most common electrical receptacle in the United States and Canada. It is a two-pole, three-wire grounding receptacle which is used for a maximum of 15A and 125V. The standard wire colors are green for Ground and white for Neutral. The color of the Hot wire can vary depending on.

NEMA 5-15 receptacle description - Schneider Electric

The Nema 1-15-P is normally referenced as a 2-prong plug that fits into a standard 110 VAC wall outlet. It has two flat blades, just like the NEMA 5-15 plug, but has no ground pin. The female mating outlet for the 1-15-P is called a 1-15-R (R for "receptacle"). Most current versions of this plug have one blade slightly wider than the other.
